1991 CONTENTS

January/February

COMPUTER-AIDED ENGINEERING AND DESIGN

CAE/CAD at AT&T: An Introduction 2
Jeffrey C. Foster

Makcal: An Application Generator for ADVICE 9
Michael S. Toth

Logic Simulation on the MARS Multicomputer 21
Prathima Agrawal, Chong Hoc Hao, and Michel Remillard

System Simulation With MIDAS 36
John W. Bierbauer, Jonathan A. Eiseman, Faiq A. Fazal, and James J. Kulikowski

ISHMAEL: An Integrated Software/Hardware Maintenance and Evolution Environment 52
James O. Coplien

Methods for Synthesizing Testable Sequential Circuits 64
Kwang-Ting Cheng and Vishwani D. Agrawal

PEST: A Tool For Implementing Pseudo-Exhaustive Self-Test 87
Eleanor Wu

An Incremental Environment for Computer-Aided Design Tools 101
Judith L. Schmidt, Thaddeus J. Kowalski, and David S. Smull

Automated Synthesis of Mixed-Mode (Asynchronous and Synchronous) Systems 111
Pasupathi A. Subrahmanyam

March/April

DEVELOPMENT PROCESSES AND APPLICATIONS

Development Processes and Applications at AT&T: An Overview 2
Alec Feiner and Katherine A. Edward

Market Analysis and Product Design for Telecommunications Equipment and Services 7
William J. Infosino, Sam H. Parker, and David G. Unger

QFD: Echoing the Voice of the Customer 18
Patrick G. Brown

Managing a Project as a Process 33
Eileen M. Sieli

Software Project Management: Moving Beyond Project Plans 40
Gerald L. Rexing

Modular Project Management 49
Edwin D. Marion and Eric J. Riddleberger

AT&T 5ESS Switch Hardware Development Methodology: A Procedure for Ensuring Quality 63
Lynn J. Brunsen, Arthur A. Frigo, Dennis J. Fitch, Frank K. Graff, and Thomas P. Groszczyk

Managing Design Changes 73
John A. Joyce, Marc C. Ayres, and Robert F. Cruickshank, III

Managing an R&D Contract With the Government 84
Robert C. Vehse, Stephen F. Nygren, and A. Duane Butherus

Development Process Audits and Reviews 99
M. Hosein Fallah, James P. Holtman, J. F. Maranzano, D. Paul Smith, and George T. Tucker

Summer

INTELLIGENT NETWORKING: NETWORK SYSTEMS

Intelligent Network Directions 2
Edward G. Sable and Herbert W. Kettler

The Evolution of Global Intelligent Network Architecture 11
George Y. Wyatt, Alvin Barshefsky, Robert V. Epley, Marc P. Kaplan, and Krish P. Krishnan

Intelligent Network Platforms in the U.S. 26
Ernest G. Russo, M. Tawfik Abdel-Moneim, Linda L. Sand, Laura J. Shaw, Patricia D. Taska, and Ronald J. Wojcik

International Applications of AT&T's Intelligent Network Platforms 44
Alexandra M. Workman, Murthy V. Kolipakam, Janis B. Sharpless, Vilma Stoss, and Hans van der Veer

Service Creation Technologies for the Intelligent Network 58
Michael J. Morgan, Michael J. Cosky, Thomas M. Gruenenfelder, T. Curtis Holmes, Jr., and Gerald A. Raack

The AT&T Service Circuit Node: A New Element for Providing Intelligent Network Services 72
Harry M. Hall, Christopher D. Carson, Earle H. West, and Lonnie D. Whitehead

Intelligent Network OAM&P Capabilities and Evolutions for Network Elements 85
Ronnie L. Bennett, Jerry C. Chen, and Thomas B. Morawski

Service Net-2000: An Intelligent Network Evolution 99
Robert L. Mayer, Ronald G. Appleton, E. Lee Sneed, and Stanley Y. Yeh

September/October

INTELLIGENT NETWORKING: BUSINESS COMMUNICATIONS SYSTEMS

Corporate Networking: Evolution and Architecture 2
George J. Ryva, Brian T. Howard, John A. Newell, and John H. Sun

Designing Networking Solutions for the Nineties: A New Approach 14
John A. Miller and Chung Ping Cheng

Corporate Networking Applications 27
Charles B. Rubinstein, George J. Ryva, and Peter S. Warwick

Call Center Solutions 36
Dean E. Harvey, Shannon M. Hogan, and John Y. Payseur

Switch-to-Computer Networking in the Nineties: The Evolution of AT&T's Switch–Computer Interface 45
Christopher F. Foard, Leslie A. Spindel, and Pramode K. Verma

Synchronization in Intelligent Digital Networks 59
Gary J. Grimes, Mark S. Russo, Christopher Lanzafame, Christopher D. Near, and Bryan S. Moffitt

Characterizing Voice Transmission Performance for Evolving Business Networks 69
Terry E. Schmalzried and Donald S. Stewart

November/December

TECHNOLOGY TRANSFER AT SANDIA

Using Sandia Technologies to Improve National Competitiveness 2
Venkatesh Narayanamurti and Dan E. Arvizu

Intelligent Systems and Technologies for Manufacturing 10
Patrick J. Eicker, David J. Miller, and David R. Strip

Environmentally Conscious Manufacturing: A Technology for the Nineties 23
Suzanne H. Weissman and Janine C. Sekutowski

Radiation-Hardened Microelectronics 31
James L. Jorgensen and David S. Yaney

Developing a Soft X-Ray Projection Lithography Tool 37
Richard H. Stulen and Richard R. Freeman

Strained-Layer Semiconductor Research and Development at Sandia 49
Paul S. Peercy

Applications, Algorithms, and Software for Massively Parallel Computing 59
Robert E. Benner and Joe M. Harris

Interactive Identification and Digital Signatures 73
Ernest F. Brickell and Kevin S. McCurley

Security and Technology: A Better Mousetrap 87
Dennis S. Miyoshi and Mary W. Green
